2.C. CREATION AND DISSOLUTION OF CLINICAL DEPARTMENTS

- (1) Clinical departments will be created and may be consolidated or dissolved by the Medical Executive Committee upon approval by the Board as set forth below.

- (2) The following factors will be considered in determining whether a clinical department should be created:
- (a) there exists a number of members of the Medical Staff who are available for appointment to, and are reasonably expected to actively participate in, the proposed new department (this number must be sufficiently large to enable the department to accomplish its functions as set forth in the Bylaws);
  - (b) the level of clinical activity that will be affected by the new department is substantial enough to warrant imposing the responsibility to accomplish departmental functions on a routine basis;
  - (c) a majority of the voting members of the proposed department vote in favor of the creation of a new department;
  - (d) it has been determined by the Chief Medical Officer and by the rest of the Medical Staff leadership that there is a clinical and administrative need for a new department; and
  - (e) the voting Medical Staff members of the proposed department have offered a reasonable proposal for how the new department will fulfill the designated responsibilities and functions, including, where applicable, meeting requirements.
- (3) The following factors will be considered in determining whether the dissolution of a clinical department is warranted:
- (a) there is no longer an adequate number of members of the Medical Staff in the clinical department to enable it to accomplish the functions set forth in the Bylaws and related policies;
  - (b) there is an insubstantial number of patients or an insignificant amount of clinical activity to warrant the imposition of the designated duties on the members in the department;
  - (c) the department fails to fulfill designated responsibilities and functions, including, where applicable, its meeting requirements;
